

Certified Refurbished

Versatile, dependable and C-arm compatible

Basic Features:

- Control from any point around the table with one-touch pendant control.
- Positioning is safe and easy using the table's easy-to-read symbols.
- Provides adequate toe space and mayo stand clearance with its narrow base design.
- Features a radiolucent top that provides clear, sharp patient imaging capability.
- Easily clean the durable, stainless steel base and column. Also easily clean between cases using swivel casters, which provide side movement.
- Fully mechanical manual brake release utilizes no battery power for emergency use.
- Provides C-arm access to nearly all of a patient's anatomy.
- Features a reversible head section you can adjust to accommodate tall patients. You can also use it as a foot extension during patient transfer.

Available with:

- Built-in kidney bridge that can provide an additional 5 inches of lift
- Snap-on X-ray top that provides side loading of full size cassettes with speed and accuracy
- Built-in secondary connector and foot control that let you operate the table by hand or foot
